## Special Notice

This statistical report presents tables showing current and historical data on U.S. foreign trade in agricultural products. Commodity and country information is for the most recent 2-year period. Statistics for fiscal year 1989 are preliminary.

U.S. foreign agricultural trade statistics in this report were derived from official data released by the Bureau of the Census. Agricultural commodities are defined as (1) nonmarine food products and (2) other products of agriculture, including fibers, raw hides and skins, fats and oils and beer and wine, which have not passed through complex processes of manufacture. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by the U.S. Customs Service.

Trade statistics for selected nonagricultural products, including fertilizer, fish, agricultural chemicals, farm machinery, and manufactured tobacco are presented at the end of the commodity group tables.

Effective January 1, 1989, the United States joined other countries in adopting a new export and import commodity classification system based on the international Harmonized Commodity Description and Coding System (HS). The HS is intended to serve as a universal product nomenclature superseding the Customs Cooperation Council and the Brussels Tariff Nomenclatures previously used by many other countries. A discontinuous series produced by the change to HS requires data users to link the October-December 1988 statistics with those indicated in the January-September 1989 tables. Data reported in the commodity group by country tables have been assigned to existing ERS commodity groups to the extent possible. Many HS commodities are now reported in more detailed form than under the old Schedule B system, while others have been combined into broader groups.

### Exports

Export data include "exports of domestic merchandise," defined as commodities grown, produced, or manufactured in the United States, and commodities of foreign origin that have been changed from the form in which they were imported. The export value is generally equivalent to a free-alongside-ship (f.a.s.) value at the U.S. port of export, based on the transaction price including inland transportation, insurance, and other costs. Agricultural exports have been adjusted for transshipments through Canada based on information provided by the Federal Grain Inspection Service. More than 1,200 revisions have been incorporated into the 1988 and 1989 tables based on Census Bureau errata.

### Imports

Import data are "imports for consumption," which include entries for immediate consumption and withdrawals from bonded Customs warehouses. The import value is defined as the "Customs value," based on the foreign market value, export value, or constructed value, and excludes import duties, freight, insurance, and other charges incurred in moving the commodity to the U.S. port.

# Get these timely reports from USDA's Economic Research Service

**These periodicals bring you the latest information on food, the farm, and rural America to help you keep your expertise up-to-date. Order these periodicals to get the latest facts, figures, trends, and issues from ERS.**

**Agricultural Outlook.** Presents USDA's farm income and food price forecasts. Emphasizes the short-term outlook, but also presents long-term analyses of issues ranging from international trade to U.S. land use and availability. Packed with more than 50 pages of charts, tables, and text that provide timely and useful information.

**Economic Indicators of the Farm Sector.** Updates economic trends in U.S. agriculture. Each issue explores a different aspect of income and expenses: national and State financial summaries, production and efficiency statistics, and costs of production for livestock and dairy and for major field crops.

**Farmline.** Concise, fact-filled articles focus on economic conditions facing farmers, how the agricultural environment is changing, and the causes and consequences of those changes for farm and rural people. Synthesizes farm economic information with charts and statistics.

**Foreign Agricultural Trade of the United States.** Every 2 months brings you quantity and value of U.S. farm exports and imports, plus price trends. Subscription includes two big 300-page supplements containing data for the previous fiscal or calendar year. A must for traders!

**Journal of Agricultural Economics Research.** Technical research in agricultural economics, including econometric models and statistics on methods employed and results of USDA economic research.

**National Food Review.** Offers the latest developments in food prices, product safety, nutrition programs, consumption patterns, and marketing.

**Rural Conditions and Trends.** Tracks rural events: macroeconomic conditions, employment and underemployment, industrial structure, earnings and income, poverty and population.

**Rural Development Perspectives.** Crisp, nontechnical articles on the results of the most recent and the most relevant research on rural areas and small towns and what those results mean.

# **EC 1992**

## ***Implications for World Food and Agricultural Trade***

The European Community's plans to establish a single internal market by the end of 1992 and other recent political and economic events in Europe have momentous implications for international food and agricultural markets.

The Economic Research Service of the U.S. Department of Agriculture and the International Commodity Markets Division of the World Bank have monitored the progress of the EC's 1992 program for the past 2 years. This joint ERS-World Bank conference will provide a current view of the EC's progress toward its 1992 goals and assess the overall effects of a completed 1992 program on world food and agricultural trade.

Distinguished European and American experts in regional trade, bulk commodities, food industries, and national and international policy issues will discuss their views and research results. Sessions will include ample time for participants to discuss the EC 1992 program and the linkages to German unification, GATT negotiations, and other events.

Abstracts of the presentations will be available upon registration with a monograph to follow.

**All sessions except luncheons are at the World Bank's Building J, southeast corner of 18th Street and Pennsylvania Avenue, NW. Luncheons are at the Mayflower Hotel, 1127 Connecticut Avenue, NW.**
